

Rotterdam; July 2026

SDS Availability

Dear Customer,

We would like to inform you that we are currently reviewing and updating our Safety Data Sheet (SDS) portfolio to ensure full compliance with the requirements of **Regulation (EC) No. 1907/2006 (REACH)** and the latest applicable provisions of **REACH Annex II concerning the compilation and supply of Safety Data Sheets**. Under **Article 31 of REACH**, suppliers are required to provide Safety Data Sheets for substances and mixtures meeting the relevant classification and regulatory criteria.

As part of this compliance initiative, we are validating and updating the regulatory information, hazard classifications, exposure data, and risk management measures contained within our documentation. This process is essential to ensure that the information provided throughout the supply chain remains accurate, up to date, and consistent with current regulatory obligations. REACH further requires that Safety Data Sheets be updated without delay whenever new information affecting hazard identification, risk management measures, authorization status, or restrictions becomes available.

We sincerely apologize for any inconvenience caused by delays in the availability of certain documents. Our regulatory teams are working diligently to complete the review process and make the updated documentation available as quickly as possible while maintaining the highest standards of regulatory accuracy and compliance.

For **urgent requests** regarding Safety Data Sheets, REACH compliance information, product regulatory status, SVHC declarations, or other regulatory documentation, please use the **“Get in Touch – Regulatory Inquiry”** option on our website. Requests submitted through this channel will be prioritized and reviewed by our Regulatory Affairs team to provide the necessary information as promptly as possible.

We thank you for your patience and understanding during this transition period and remain committed to fulfilling our obligations under REACH and supporting our customers with reliable regulatory information.

Should you require additional assistance, please do not hesitate to contact us through the Regulatory Inquiry portal.

Kind regards,

Velogy Product Safety Department
