Subject : Packaging and Packaging Waste Regulation (EU) 2025/40 (PPWR)

On 22 January 2025, the European Union published Regulation (EU) 2025/40 on Packaging and Packaging Waste (PPWR) in the Official Journal of the European Union. This Regulation replaces the Packaging and Packaging Waste Directive, which was originally introduced in 1994.

The PPWR is a key component of the EU Circular Economy Action Plan and establishes binding requirements aimed at reducing the environmental impact of packaging, promoting reuse and recycling, and minimizing packaging waste.

Article 5 – Substances in Packaging

1. Substances of Concern

Substances of concern that may be present in packaging materials should be minimized.

Velogy's raw material suppliers have declared the substances that may be present in the raw materials used to manufacture Velogy products. Based on these supplier declarations, any identified substances are not considered harmful to human health under the intended conditions of use.

Information on the identified end uses of Velogy products is available in the applicable **Product Regulatory Summaries**.

Information regarding Substances of Very High Concern (SVHCs), as defined under the REACH Regulation, can be found in Section 15 of the applicable **Safety Data Sheet (SDS)**.

2. Heavy Metals

Article 5 limits the combined concentration of lead, cadmium, mercury, and hexavalent chromium in packaging to a maximum of 100 mg/kg (100 ppm).

Based on available raw material data, supplier declarations, and knowledge of our manufacturing processes, Velogy confirms that these substances are neither intentionally used nor intentionally added during the manufacture of its products. Accordingly, Velogy declares that the products it manufactures and supplies comply with the 100 ppm limit for the combined concentration of lead, cadmium, mercury, and hexavalent chromium.

3. Per- and Polyfluoroalkyl Substances (PFAS)

PFAS comprise a broad group of per- and polyfluoroalkyl substances with a wide range of physicochemical properties. Fluoropolymers are included within the PFAS definition.

From 12 August 2026, food-contact materials and articles containing PFAS at or above the concentration limits specified in Article 5(4) of Regulation (EU) 2025/40 may no longer be placed on the EU market.

According to studies published by the European Commission and conducted by RISE Research Institutes of Sweden, polyolefins with no intentionally added PFAS do not exceed the regulatory threshold of 50 ppm.

Based on available raw material data, supplier declarations, and knowledge of our manufacturing processes, Velogy confirms that PFAS are neither intentionally used nor intentionally added during the manufacture of its products. Accordingly, Velogy declares that the products it manufactures and supplies comply with the 50 ppm limit.

Summary

Based on available raw material data, supplier declarations, manufacturing process knowledge, and material assessments, Velogy confirms that its products* comply with the requirements of Article 5 of Regulation (EU) 2025/40 on Packaging and Packaging Waste.

This statement is based on information provided by suppliers and other product-related data reasonably available to Velogy. No analytical testing or independent laboratory verification has been performed to confirm compliance.

This declaration is provided in good faith and reflects the information available at the time of assessment. It does not relieve customers of their responsibility to perform their own due diligence and to ensure compliance with all applicable laws, regulations, and product-specific requirements.

No representation or warranty, express or implied, is made regarding the completeness, accuracy, or continuing validity of this information under all conditions of use, across all jurisdictions, or in light of future regulatory changes. Velogy reserves the right to update this declaration as additional information becomes available. (*** Excluding AdvyForm H0260.**)

This declaration applies also to all packaging used by Velogy for the supply and transport of its products, including pallets, unless otherwise specifically stated.

Kind regards,

Velogy Product Safety Department
